Powerful Features for Perfect Data

DataGenie combines advanced Al algorithms with intuitive design to deliver the most comprehensive data cleaning solution available.

AI-Powered Detection

Automatically identifies inconsistent formats, timestamps, and data types across your datasets.

- Format standardization
- Pattern recognition

Intelligent Imputation

Smart missing value detection with context-aware imputation strategies.

- Statistical analysis
- Pattern-based filling

Outlier Detection

Advanced algorithms flag anomalies and outliers for review and decision.

- Statistical outliers
- Business rule validation
- Anomaly scoring

Data Merging

Seamlessly merge multiple datasets with intelligent field mapping and normalization.

- Schema alignment
- Ouplicate detection
- Relationship mapping

Quality Reports

Comprehensive data quality assessments with actionable insights.

- Quality metrics

Lightning Fast

Process thousands of records in seconds with enterprise-grade performance.

- Parallel processing
- Memory optimization
- Real-time results

How DataGenie Works

Transform your messy data in three simple steps

1

Upload Dataset

Simply drag and drop your CSV, Excel, or JSON files. Our system instantly analyzes your data structure.

2

Al Processing

Our advanced algorithms detect issues, clean data, and provide intelligent recommendations in seconds.

3

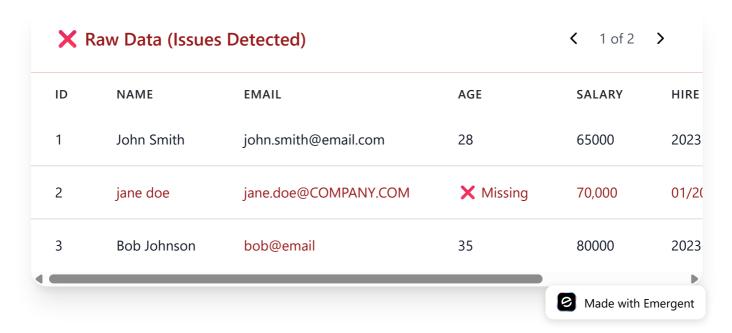

Download & Share

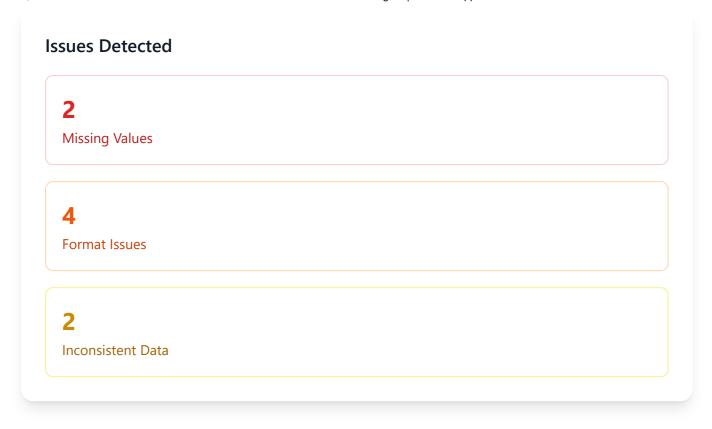

Get your cleaned dataset instantly, plus detailed reports and shareable links for team collaboration.
